DevOps days Session 2 from Michael Jolley

Tuesday, November 12, 2019   10:02 AM

@michaeljolley
Thinking inside in the box
Developing inside a container
How to move them up the DevOps stack
Remote development extension for viscose
Can install docker, vscode, and one more to be up and running
Using PowerShell and containers
Have installed docker and remote code extension
Send to 12053501515 for slides and notes
Made a demo of running a container with a web app on local host port 3000
Also using Git repos to pull down containers and letting developers use them to develop their
code
